A close-up photograph of a white spiral-bound calendar. The word "OCTOBER" is printed in large, bold, black letters across the top. Below it, the days of the week "FRI" and "SAT" are visible. The number "1" is prominently displayed in the bottom right corner, indicating the first day of the month. A small red "SU" is partially visible to the right of "SAT".

ARE YOUR CANDIDATES GETTING AN ETA100 ERROR?

Candidates getting an error that their test isn't active yet? Check your time zone (DAYLIGHT vs STANDARD) when scheduling.

Excel is one of the most popular computer application for business and personal use and education. Over 99% of businesses worldwide use Microsoft Office®, and there is particularly high demand for Microsoft Excel® skills as employees - from data entry clerks to senior executives - use spreadsheets to organize and manage data. Have you ever wondered about the differences between the various versions we offer?

Most of the Kx MS Office product assessments contain a mix of basic, intermediate and advanced questions; the difference is the ratio.

The Normal User version is considered the most “basic” of the options as it contains the most questions on that category (versus intermediate or advanced). Power User focuses on more advanced features (like pivot tables, macros and V-LOOKUP for Excel) and Whole Test which combines the questions from the other two. If your position doesn't require advanced knowledge immediately, the Normal User version may be the best choice.

Please remember that you can use the “PREVIEW EXPERIENCE” feature to review the tests, as needed.
